DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 5,

It is not clear within the claim language what is meant by the limitation of the dispersive device represents at least part of the reflecting unit. Is the dispersive device a reflecting unit?

Regarding claim 7,

It is not clear within the claim language what is meant by the limitation of the dispersive device represents at least part of the lens. Is the dispersive device a collimating lens?

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 2828

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 5, 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Spuehler et al (US 6,778,565).

Regarding claim 1,

Figure 10 illustrates a tunable laser including a first reflecting unit (322), a second reflecting unit disposed on tuning means (801) column 20 line 19, where the reflecting form a cavity, which includes a dispersive device (802) column 20 line 28. Column 20 lines 11-29 discloses the tuning means providing cavity length tuning [applicant's optical path increases].

Regarding claims 2, 3,

Column 20 lines 11-29 discloses the dispersive element (802) as selecting the wavelength [applicant's single mode].

Regarding claim 5,

Figure 10 illustrates the dispersive element (802) adjacent to the second reflecting unit disposed on tuning means (801) column 20 line 19.

Regarding claim 6,

Figure 10 illustrates a lens (14).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Spuehler et al (US 6,778,565) in view of Zavartsev et al (US 5,970,079).

Spuehler et al discloses the claimed limitations of claim 1 in particular discloses the dispersive device as being a dispersive prism, but is silent as to the material of the dispersive prism.

However, it is well known in the art for dispersive prism being used as intracavity components and made of Ge (germanium), as disclosed by Zavartsev et al in column 6 lines 2-3.

Allowable Subject Matter

Claims 4, 8, 9, 10, 13 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
